Comment : Hello. WIMZ -- a non-local station from Knoxville TN -- interferes incredibly with WPVM-LP (Asheville NC) because of the mountains....radio signals travel significantly different in the mountains!

LPFM stations should be permitted to own translators.

I support the FCC position on getting rid of the obsolete regulation of 1/3rd adjacent channel spacing.

Also, I support the FCC efforts to increase the number of LPFM stations on the air and strengthen the viability of those stations that are already operating.
